About the Data

This publication provides a data source for Alberta's international trade, and is intended to provide businesses with information on current export markets.

A profile is included for each country that imported over $10 million worth of Alberta's goods in 2003. Each profile lists the top 15 commodities Alberta exported to that country and compares those to Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Industry Canada's regional groups are used. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see Appendix A).

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, some commodity descriptions accompanying these codes have been revised from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

Statistics Canada is the main source of information for the publication. Estimates for commercial and transportation service exports are developed by Alberta Economic Development and are based on special surveys conducted by Statistics Canada. The informational captions appearing at the top right corner of each country profile are from *World Factbook 2003*. The term "nes" refers to "not elsewhere specified."

The term "exports" refers to "domestic exports," goods grown, extracted or manufactured in Canada. The term includes goods of foreign origin, which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, these exports, including travel and tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

The Year in Review

Alberta's international exports rise 14.1% in 2003

Alberta exported $62.8 billion worth of goods and services to more than 170 countries in 2003, an increase of 14.1% from 2002's total of $55.1 billion. This total includes $56.7 billion in commodity exports and $6.1 billion in service exports. Canadian exports of goods and services fell by 3.1% in 2003, the third consecutive year of declines.

Commodity Exports

The value of commodity exports grew by 16.5% from $48.7 billion in 2002 to $56.7 billion in 2003. Of the 178 countries Alberta exported to, the top markets were the United States, Japan and China. The United States imported $51.1 billion worth of goods, Japan $1.2 billion and China $740 million.

The main reason for Alberta's increase in exports was higher commodity prices, particularly for natural gas and gas liquids, refined petroleum products, crude oil and chemicals. Higher volumes of crude oil also played a role. Although the value of Alberta exports grew strongly in 2003, export volumes actually declined by between 2% and 3% because of the effects of Bovine Spongiform Encephalopathy (BSE) on the livestock and food processing industries, lower volumes of natural gas to the U.S. and the continued slump of the global telecommunication equipment industry.

The decline in Alberta export volumes was partly the result of the global economic slowdown. On a global scale, the manufacturing sector was in a recession in 2001 and 2002 and remained weak in 2003, with output in the Information and Communication Technology (ICT) goods producing sector falling for the third consecutive year. This negatively affected Alberta's exports of telecom equipment, and also led to declines for a number of other manufacturing sectors. Continued weakness in the U.S. economy in the first half of 2003, combined with a recession in the European Union, impacted world trade in both goods and services. Since peaking in 2000 with growth of more than 12%, world trade volumes have seen little subsequent growth. Although trade volumes grew 4.5% in 2003, this rate is lower than the 6% average for the 1990 – 2000 period.

The supply of primary agricultural products to world markets continued to be constrained in the first nine months of 2003, because of two consecutive years of drought in Alberta. This resulted in reductions in export volumes of grains, oilseeds and pulse crops (such as peas) for that period. However, near normal growing conditions in 2003 led to a sharp increase in export volumes in the fourth quarter and caused a slight increase in overall crop exports for all of 2003.

Regionally, Alberta's major markets were the United States, Asia and Western Europe. The US accounted for 90.1% of total commodity exports, Asia for 5.4% and Western Europe for 1.7%. Exports to the U.S., Western and Eastern Europe and Oceania, were higher than in 2002, while exports to Asia, Central and South America, the Middle East and Africa declined. Exports to the U.S. rose 19.1% to $51.1 billion and to Western Europe by 5.6% to $980 million, but exports to Asia fell by 5.3% to $3.1 billion.

Commodity exports can be classified into three sectors: mining and energy, primary agriculture, and manufacturing. The mining and energy sector accounted for the majority of exports at $39.6 billion, followed by the manufacturing sector at $14.5 billion and primary agriculture at $1.8 billion. In 2003, exports by the mining and energy sector increased by 31.7%, but in the manufacturing sector they fell by 6.5% and by 20.5% in primary agriculture.

Service Exports

Service exports were estimated at $6.1 billion in 2003, 4.4% lower than in 2002. Included in this figure are $1.3 billion in international travel and tourism receipts, $2.2 billion in exports of transportation services and $2.7 billion of commercial services. Service exports, especially tourism, continued to be influenced by the events of September 11, SARS, uncertainty about the war in Iraq and the possibility of further terrorist attacks.

Unlike commodity exports, services cannot be included on a country specific basis. Therefore, unless otherwise specified, the term "export" in the remainder of this publication will refer strictly to commodities.

Market Influences

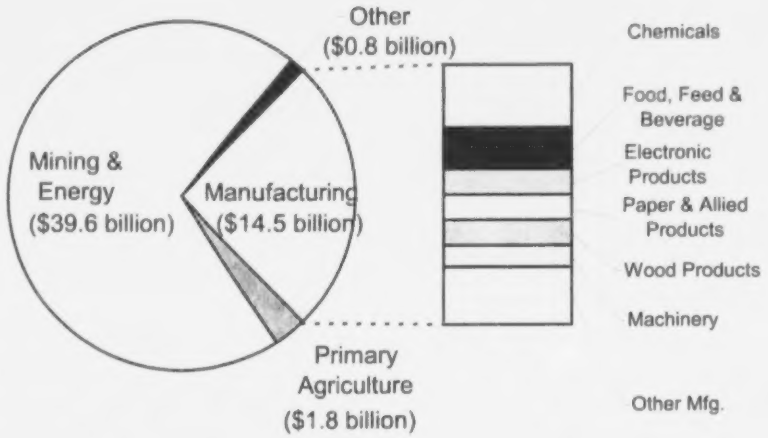
Some of the factors that influenced Alberta's 2003 trade include:

- low world economic growth causing a modest increase in world trade volumes,
- strong Canadian and euro currencies...
- ...and a sharp decline in the value of the U.S. dollar,
- the euro region (European Union) was in a recession in the first half of 2003...
- ...while the U.S. economy was expanding rapidly in the second half,
- unexpectedly strong economic growth in Japan...
- ...but very weak growth in Latin America,
- global tourism and aviation industries continue to suffer...
- ...and the global manufacturing industry and high tech sector remained weak in the first part of 2003, followed by a gradual but slow recovery,
- detection of BSE in Alberta and subsequent closing off of international borders to Canadian cattle and beef...
- ...and low supplies of Alberta grains and oilseeds because of two years of drought,
- recovery in global stock markets...
- ...and in business and consumer confidence,
- high natural gas and crude oil prices...
- ...and increased prices for petro-chemicals and refined petroleum products,
- California's ban on methyl tertiary-butyl ether as a gas additive,
- a sharp decline in export volumes of coal to Asia, and
- the U.S. - Canada lumber dispute.

Alberta Exports by Industry

The value of Alberta's commodity exports in 2003 was $56.7 billion, an increase of 16.5% from 2002. The increase is largely due to higher prices for gas and gas liquids, refined petroleum products, crude oil and chemicals. Higher volumes of crude oil also played a role.

Alberta exports rise sharply despite BSE and a weak world economy



Alberta's commodity exports are divided into three main sectors: mining, manufacturing and primary agriculture. The mining sector accounted for $39.6 billion (70%) of Alberta's commodity exports. This consisted primarily of natural gas and crude petroleum at $22.1 billion and $15.9 billion, respectively. Mining exports were 32% higher than in 2002, the result of higher prices for natural gas, gas liquids and crude oil, as well as increased oil volumes.

The manufacturing sector accounted for $14.5 billion in exports, a decline of 6.5% from 2002. It continued to be adversely affected by the weak global manufacturing sector, as well as the loss of export markets for Alberta beef, as a result of the detection of BSE. Exports of computer and electronic products (mainly telecommunication equipment) fell by 31%, of food, feed and beverages by 19% and of transportation equipment by 34%. Strong performances were recorded for the refined petroleum products sector (up 27%), as well as non-metallic mineral products (up 13%) and primary metals (up 11%).

Primary agricultural exports totaled $1.8 billion in 2003, a drop of 21% from 2002. Exports of crops rose marginally by 0.2%, but livestock exports plummeted 61% because of BSE. Lower exports of grains, such as wheat, durum wheat and barley, were more than offset by a 44% increase in canola shipments. Live cattle exports declined by 69% as a result of BSE, while hog exports fell 30% on lower volumes.

Alberta Exports by Industry - 1998 to 2003

	($millions)						Percent Change 2002/03	Percent Change 1998/2003

1. Estimate

Agriculture, Food and Beverages

BSE causes sharp decline in agricultural exports

The combined export value of primary agriculture and food and beverages (agri-foods) was $4.1 billion in 2003, a decline of 19% from 2002's $5.1 billion and the result of the single case of BSE detected in the province. Primary agricultural exports fell 21% to $1.8 billion, while exports of food and beverages declined 19% to $2.3 billion. The leading agri-food exports were beef products at $1.1 billion, wheat (including durum wheat) at $679 million, and oil seeds at $581 million.

Beef exports declined by 34% to $1.1 billion on lower volumes as a result of the border closures, especially in the U.S. and Mexico. Pork exports jumped 31% to $259 million because of increased volumes to Japan. A large rise in export volumes of canola oil-cake and meal to the U.S. caused exports of vegetable fats and oils to rise 18% to $249 million. Frozen food shipments (mainly potato products) fell by 9.7% because of lower volumes shipped to the U.S.

The combination of lower export volumes and lower prices caused a 13% drop in the value of wheat exports (including durum wheat) to $679 million. Wheat exports to the U.S., the second largest importer of Alberta wheat in 2002, plummeted by nearly 90%, and exports to Japan, Algeria and Indonesia were also sharply lower. Oil seed shipments rose strongly by 38% to $581 million: Japan, Mexico, Pakistan and China increased their import volumes of Alberta canola. Live cattle exports to the US declined by 69% to $196 million because of BSE.

Alberta's Major Agricultural Exports
(including Food & Beverage Manufacturing)

	2002 ($ '000)	2003 ($ '000)	Percent Change
Beef products	1,648,048	1,094,260	-33.6%
Wheat, including durum wheat	780,217	678,958	-13.0%
Oil seeds (canola, mustard seed, flaxseed)	422,413	581,269	37.6%
Pork products	197,034	259,013	31.5%
Vegetable fats & oils (e.g. canola oil & cake)	209,204	248,791	18.9%
Cattle, live (includes bison)	636,726	196,351	-69.2%
Frozen foods (potatoes)	165,999	149,851	-9.7%
Malt & flour milling	156,094	140,745	-9.8%
Raw hides & skins	126,358	129,209	2.3%
Other grains (barley, oats)	84,526	75,308	-10.9%
Forage products (hay, alfalfa)	96,676	73,147	-24.3%
Peas & beans	64,125	56,913	-11.2%
Swine, live	75,728	54,296	-28.3%
Total Above	**4,663,148**	**3,738,111**	**-19.8%**
TOTAL AGRICULTURE, FOOD & BEVERAGES	**5,148,326**	**4,146,694**	**-19.5%**

About 48% of agri-food exports went to the United States ($2.0 billion), mostly in the form of beef products ($910 million), cattle ($196 million), canola oil-cake and meal ($125 million) and frozen potato products ($111 million). Other major agri-food markets were Japan (canola and pork) and Mexico (canola and beef) at $786 million and $296 million, respectively.

Mining

Mineral fuel exports up sharply because of higher prices

Mining exports in 2003 were valued at $39.6 billion compared to $30.1 billion the year before. Major factors behind this 32% increase were a $6.4 billion jump in the value of natural gas, as prices were substantially higher in 2003 than in 2002, and a $3.2 billion rise in crude oil exports, caused by a combination of higher prices and higher volumes.

The 41% increase in the value of gas exports occurred solely because of higher prices (up 52%), as volumes shipped fell by about 7%. Crude oil increased by 25%, as a result of a 15% rise in volumes and a 9% rise in prices. Although volumes declined by 21%, liquefied petroleum gas exports rose 10% because of much higher prices. More than 99% of these products were exported to the U.S.

Sulphur exports were up 28% in 2003 on higher prices. The largest markets were the U.S. ($51.4 million), Japan ($50.5 million) and Brazil ($35.8 million).

A 72% drop in coal exports in 2003 was caused by lower volumes, especially to South Korea, Japan and Brazil. The major coal market was the U.S. ($49.2 million). Coal exports to Japan have fallen steadily since 1995, and totaled only $12.8 million in 2003, a 97% decline from 1995's value of $424 million.

Alberta's Major Mining Exports

	2002 ($ '000)	2003 ($ '000)	Percent Change
Natural gas	15,740,896	22,129,168	40.6%
Crude petroleum	12,666,291	15,862,675	25.2%
Petroleum gases, liquefied:	1,195,339	1,318,400	10.3%
Propane, liquefied	*925,003*	*1,107,029*	*19.7%*
Butanes, liquefied	*137,440*	*158,474*	*15.3%*
Other, liquefied	*132,896*	*52,897*	*-60.2%*
Sulphur	147,824	189,887	28.5%
Coal	276,160	77,727	-71.9%
Total Above	**30,026,597**	**39,580,080**	**31.8%**
TOTAL ALL MINING	**30,083,390**	**39,618,084**	**31.7%**

The majority of Alberta's mining exports went to the United States, consisting mostly of crude petroleum, natural gas and propane. More than 99% was imported by the U.S., while the rest was imported primarily by Japan and Brazil.

Manufacturing

BSE, low U.S. dollar and weakness in global ICT sector affect manufacturing exports

After declining by 12% in the previous two years because of the manufacturing sector's global recession and the high tech meltdown, Alberta's manufacturing exports fell by a further 6.5% in 2003. A number of events happened in 2003 that explain Alberta's decline in manufacturing exports: the drop in the value of the U.S. dollar (that made Canadian exports less competitive in the U.S.), the high tech meltdown, BSE and California's ban of methyl tertiary-butyl ether (MTBE). Manufacturing export volumes (rather than values) fell by between 8% and 9%, mainly as a result of lower exports of beef, MTBE and telecom equipment.

The manufacturing sector accounted for 26% of all commodity exports in 2003. Even with the declines of the past three years, this sector's exports were still 27% higher in 2003 than they were in 1998 and nearly triple 1993's value.

Of the 15 industries that comprise this sector, eight increased their export values compared to 2002. Significant gains occurred in *refined petroleum products* (up 27%). Exports of *computer and electronic products*, mostly telecom equipment, declined 31%, of *transportation equipment* 34% and of *food, feed and beverages* 19%.

The *chemical* industry remained Alberta's largest sub-sector with exports of $3.6 billion, followed by *food, feed and beverages* with $2.3 billion. The other sub-sectors with exports in excess of $1 billion were *computer and electronic products*, *wood products* and *paper products and wood pulp*, each with $1.4 billion, and *machinery* ($1.2 billion).

Alberta's Manufacturing Exports by Industry

	2002 ($ millions)	2003 ($ millions)	Percent Change
Chemicals	3,404.4	3,615.3	6.2%

Wood Products	1,319.5	1,401.0	6.2%
Other Manufacturing	118.8	137.4	15.6%
TOTAL MANUFACTURING	**15,523.4**	**14,507.2**	**-6.5%**

The major manufactured commodity exports in 2003 were synthetic resins (such as polyethylene), wood pulp, beef, telecommunication equipment and refined petroleum products (such as gasoline and diesel fuel). Collectively, these accounted for just over one third of all manufactured products.

Exports of telecommunication equipment fell by 42% between 2002 and 2003. The telecom sector's export value has plummeted by 80% during the past three years, as a result of the world wide high tech meltdown, which especially affected manufacturers of telecom equipment.

California's recent ban of the gasoline additive MTBE resulted in a $311 million export loss, as exports of this commodity dropped to zero in 2003.

Beef exports plummeted 34% in 2003, as most international trading partners closed their borders to Alberta beef (and cattle), because of a single case of BSE in the province. Our largest beef markets re-opened their borders to selected cuts of meat in September and October.

The manufactured commodities with the strongest growth in 2003 compared to the previous year were:

- ethylene copolymers (up $277 million, or 48%)
- polyethylene (up $245 million, or 63%)
- oriented strand board (up $184 million, or 48%)
- saturated acyclic hydrocarbons (up $150 million, or 456%)
- nickel (up $128 million, or 50%)

The first four of these five commodities were exported primarily to the United States, while three-quarters of nickel exports went to the European Union. China and Belgium also were significant customers for Alberta's ethylene polymers. Exports of anhydrous ammonia, sulphur, light oils (refined), pork and canola oil-seed cake and meal also increased sharply.

A total of $10.5 billion of manufactured commodities was imported by the U.S. in 2003, a decline of $0.9 billion or 8.2% from 2002, because of lower volumes of telecom equipment, beef and MTBE. As a result, export values for the *computer and electronics* and *food, feed and beverage* sectors fell sharply. Even though MTBE exports vanished, the *chemical* sector performed well as prices and volumes were higher for most commodities. The sharp drop in the U.S. dollar likely caused export values in many other sectors, such as *transportation equipment, paper and wood pulp* and *furniture*, to decline as well. The top three manufacturing sectors for Alberta - U.S. export trade in 2003 were: *chemicals* ($3.0 billion), *food, feed and beverages* ($1.6 billion) and *wood products* ($1.3 billion).

The Asian countries of Japan ($669 million), China ($606 million), South Korea ($298 million) and Taiwan ($267 million), were the next largest markets for goods manufactured in Alberta. Manufacturing exports to Japan were 0.7% higher, as increased exports of pork more than offset lower beef exports. Exports to China fell 4.5%, because of lower ethylene glycol and artificial filament tow (for cigarette filters) exports. South Korean imports of manufactured goods from Alberta fell by 19%, because of large declines in wood pulp and beef imports. Increased imports of hides & skins led to a 6.1% increase for Taiwan, another major market for Alberta's manufacturing sector. Overall, *paper and wood pulp, chemicals*, and *food, feed and beverages* were Alberta's top manufacturing export sectors to Asia.

Alberta's largest European Union markets for manufactured goods were Belgium ($160 million), the United Kingdom ($152 million), the Netherlands ($120 million), Italy ($88 million), and Germany ($84 million). For Belgium, the U.K. and the Netherlands the largest manufacturing import was nickel, and for Germany and Italy wood pulp.

Mexico's manufacturing imports from Alberta declined by 21% to $239 million, as a result of a sharp BSE related reduction in beef imports. Smaller markets with significantly higher imports of manufactured goods include Australia (gas compressors and ethylene polymers), Brazil, Russia and Azerbaijan (oil and gas field equipment), and Ecuador (refined petroleum).

Forestry, including Wood, Paper and Allied Products

Forest product exports decline despite record OSB prices

Overall forestry product exports totaled $2.8 billion in 2003, a drop of 1.4% from 2002. This decline was mainly the result of lower prices and volumes for wood pulp and newsprint. Wood pulp, the sector's largest export, decreased 4.8% as a result of a slight drop in prices. The value of lumber shipments fell 12%, as higher volumes failed to offset a steep decline in prices, caused in part by the rise in the Canadian dollar against the U.S. dollar. Oriented strand board (OSB) exports increased sharply by 48%, as OSB prices reached record highs in 2003.

Alberta's Major Forestry Exports
(includes Wood, Paper and Allied Products)

	2002 ($ '000)	2003 ($ '000)	Percent Change
Wood pulp	1,257,592	1,196,981	-4.8%
Lumber	664,957	585,152	-12.0%
Oriented strand board & waferboard	387,138	571,151	47.5%
Newsprint	167,767	114,471	-31.8%
Fibreboard	45,813	38,749	-15.4%
Plywood	39,337	37,066	-5.8%
Builders' joinery and carpentry	43,193	36,873	-14.6%
Total Above	**2,605,797**	**2,580,443**	**-1.0%**
TOTAL ALL FORESTRY	**2,826,379**	**2,787,643**	**-1.4%**

The primary markets for wood pulp were the United States ($453 million), South Korea ($180 million), Japan ($166 million) and China ($147 million). Pulp exports to the U.S., South Korea and Japan fell by 9%, 11% and 14%, respectively, while Chinese imports rose 47%. The U.S. is by far the largest market for OSB, accounting for about 99% of the total.

The value of lumber exports fell by 12% in 2003. This was the result of a 16% decline in lumber exports to the U.S., which accounts for 87% of Alberta lumber exports. Japan increased lumber imports by 38% to $66 million.

Major markets for forestry products were the United States ($2.0 billion), Japan ($239 million), South Korea ($182 million) and China ($148 million).

Chemicals

Higher world prices cause exports of chemical sector to grow

The value of chemical exports rose 6.2% to $3.6 billion, due to higher prices. However, overall volumes fell by approximately 2%, mostly as a result of California's recent ban of the gasoline additive MTBE, resulting in a $311 million export loss. Most major commodities had higher prices – the largest price increases were registered by anhydrous ammonia, methanol and ethylene glycol. Export volumes rose strongly for saturated acyclic hydrocarbons and for polyethylene and ethylene copolymers.

Ethylene copolymers remained Alberta's largest chemical export with a value of $855 million, a 48% increase from 2002, as a result of strong growth in both volumes and prices. The commodity's major market was the U.S., which accounted for $720 million or 84% of ethylene copolymer exports. Copolymer exports to China declined marginally to $55 million.

Polyethylene exports, most of which were destined for the U.S., advanced 63% to $634 million, as both prices and volumes increased. Exports of styrene declined by 16% in 2003 to $424 million because of lower prices. The U.S. was the sole market for Alberta styrene.

Alberta's Major Chemicals

	2002 ($ '000)	2003 ($ '000)	Percent Change
Ethylene copolymers	578,573	855,341	47.8%
Polyethylene	388,689	633,530	63.0%
Styrene	506,144	423,799	-16.3%
Ethylene glycol	341,369	277,325	-18.8%
Urea	273,016	222,152	-18.6%
Anhydrous ammonia	142,589	199,379	39.8%
Acyclic hydrocarbons, saturated	32,951	183,193	456.0%
Ethylene-vinyl acetate copolymers	106,479	115,626	8.6%
Artificial filament tow	141,900	115,191	-18.8%
Methanol	66,179	107,961	63.1%
Ammonium nitrate	41,143	57,097	38.8%
Total Above	**2,619,032**	**3,190,594**	**21.8%**
TOTAL ALL CHEMICALS	**3,404,413**	**3,615,310**	**6.2%**

Exports of ethylene glycol dropped by 19% to $277 million, because of a sharp drop in volumes to the largest three markets: China, the U.S. and South Korea. Exports of ethylene glycol to China, Alberta's largest market for this commodity, fell by 19% to $185 million. Urea exports also dropped by 19% to $222 million, as a result of lower volumes to the U.S.

Major markets for chemicals were the United States ($3.0 billion), China ($335 million), South Korea ($37 million), and Taiwan and Belgium ($23 million each).

Computer and Electronic Products

Global high tech slump continues to affect exports of telecom equipment

Because of the global high tech slump, Alberta's exports by the computer and electronic products industry, mostly telecom equipment, fell by 31% in 2003. The export estimate of $1.4 billion for that year was significantly lower than the $2.1 billion in 2002 and $4.5 billion in 2000.

Exports of telephone apparatus fell by 42% to $782 million, because U.S. demand fell by one-half – exports to international markets other than the U.S. declined 19%. Wireless communication equipment exports declined 8% to $271 million because of large declines for France and the U.K., while U.S. imports fell by 5%. Exports of navigational, measuring and control apparatus (e.g. surveying instruments and gas or smoke analysis apparatus) were 6% lower at $290 million: large declines for Peru, Russia, the U.K. and a 12% drop in U.S. imports.

The United States accounted for $1.0 billion or 71% of Alberta's computer and electronic product exports. Other major destinations include Taiwan ($98 million), Hong Kong ($44 million) and China ($36 million).

Alberta's Major Computer & Electronic Product Exports

	2002 ($ '000)	2003 ($ '000)	Percent Change

Machinery

Machinery exports fall because of lower demand in the Middle East and the U.S.

In 2003, machinery exports fell by 2.3% to $1.2 billion even though the energy sector, the main customer for this sector's output, remained strong. Exports to the U.S. decreased 6.2% to $696 million, partly because of reduced sales of compressors. Exports of machinery to the Middle East fell by one-third, because of lower demand in Yemen, Iran, Iraq and Libya. Exports to Mexico, Algeria, Brazil, Azerbaijan and Russia rose strongly.

Exports of oil and gas field machinery, mainly boring and sinking machinery and parts thereof, declined 20% to $298 million, as a result of reduced demand in Singapore, Yemen, Iran and Venezuela. Shipments to the U.S., which account for about one-half of this sector's exports, remained unchanged from 2002.

Exports of other industrial machinery, much of which is used by the oil and gas sector, increased 11% to $219 million, because of very large increases in Azerbaijan and Brazil. Exports to the U.S. fell by 13% to $99 million.

Although demand in the U.S. declined by 7% to $128 million, overall exports of pumps and compressors, mainly energy related, increased by 15% to $209 million. This increase was driven by strong demand in Australia, Russia, Algeria and Brazil.

The United States accounted for 57% of machinery exports. Other major markets include Russia, Mexico, Algeria, Brazil, Australia, China, Yemen, Azerbaijan, Iran and the United Arab Emirates (each importing more than $20 million).

Alberta's Major Machinery Exports

	2002 ($ '000)	2003 ($ '000)	Percent Change

Alberta Exports by Region

U.S. imports from Alberta grow strongly, but most other regions reduce their imports

The U.S. continues to be Alberta's largest market with exports valued at $51.1 billion or 90.1% of total 2003 shipments. Asia represents Alberta's second largest regional market, capturing 5.4% of Alberta exports, followed by Western Europe (1.7%) and Central America (0.9%).

Alberta's Exports by Region

	2002 ($'000)	% of Total	2003 ($'000)	% of Total	% Change 2002/2003

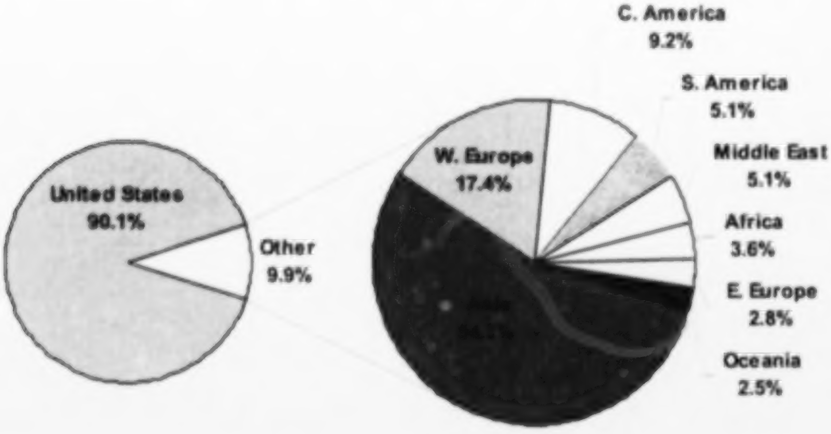
TOTAL	**48,694,490**	**100.0**	**56,741,992**	**100.0**	**16.5**

* Includes Mexico and the Caribbean



Four of the nine regions increased their imports of Alberta goods in 2003, while the other five had lower imports than in 2002. Exports to the U.S. rose 19%, mainly because of large price increases for natural gas, gas liquids, crude oil, refined petroleum and petro-chemicals. Exports to regions outside the U.S. dropped 2.5%, due to an 89% drop in coal shipments and a sharp decline in beef exports as a result of BSE.

The largest declines came from Central and South America, with Venezuela and Brazil in a recession and Mexico drastically lowering its beef imports. Large increases for oil and gas field equipment and wheat caused Eastern European imports to rise strongly by 38%. Oceania (mainly Australia and New Zealand) increased its Alberta imports by 41% because of a more than 50% in increase in manufactured goods (especially petro-chemicals and machinery).

Alberta Exports by Region

The U.S. continues to be Alberta's largest market with exports valued at $51.1 billion or 90.1% of total 2003 shipments. Asia represents Alberta's second largest regional market, capturing 5.4% of Alberta exports, followed by Western Europe (1.7%) and Central America (0.9%).

Four of the nine regions increased their imports of Alberta goods in 2003, while the other five had lower imports than in 2002. Exports to the U.S. rose 19%, mainly because of large price increases for natural gas, gas liquids, crude oil, refined petroleum and petro-chemicals. Exports to regions outside the U.S. dropped 2.5%, due to an 89% drop in coal shipments and a sharp decline in beef exports as a result of BSE.

The largest declines came from Central and South America, with Venezuela and Brazil in a recession and Mexico drastically lowering its beef imports. Large increases for oil and gas field equipment and wheat caused Eastern European imports to rise strongly by 38%. Oceania (mainly Australia and New Zealand) increased its Alberta imports by 41% because of a more than 50% in increase in manufactured goods (especially petro-chemicals and machinery).

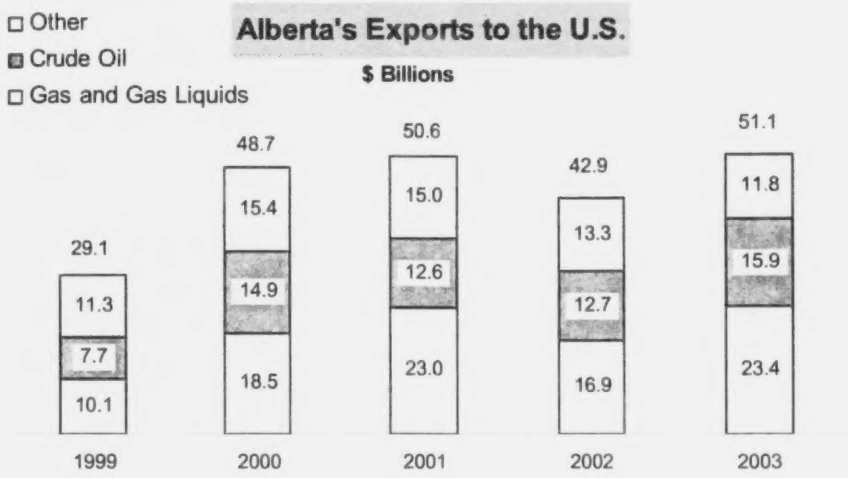
United States of America

Higher energy prices contribute to recovery in U.S. bound exports

After a slowdown at the end of 2002 and the beginning of 2003, the U.S. economy grew strongly in the second half of 2003 – ending the year with a 3.1% increase in real GDP. During the year, the U.S. imported a record $51.1 billion from Alberta, 19% more than in 2002.

Higher prices, especially for natural gas, gas liquids and crude oil were the main reason for the sharp recovery in U.S. bound exports in 2003. Although export volumes of crude oil and refined petroleum products rose strongly, volumes were lower for most other commodities, especially for electronics (telecom equipment), natural gas and gas liquids, food products (beef), transportation equipment and primary metals.

Dominated by movements of crude oil and especially natural gas, Alberta has seen the value of its exports to the U.S. grow by 76% over the last five years – the largest increase of all regions.



Alberta's Exports to the U.S.

$ Billions

Through its rapid expansion into the U.S. market, Alberta has been able to increase its share of Canadian exports to that country. Alberta's market share of Canadian exports to the U.S. reached 16.8% in 2003, up from 13.5% in 2002, and up from 10.1% in 1999.

About $22.1 billion worth of natural gas flowed from Alberta to the U.S. in 2003, up 41% from the previous year. Although gas prices rose strongly (by 52%) volumes shipped declined by 7%, because of the weak U.S. economy (in the first half) and declining Alberta reserves. Exports of gas liquids rose 10% to $1.3 billion, as a 40% price rise more than offset a drop in volumes.

Alberta's next largest export to the U.S., crude oil, increased by one quarter to $15.9 billion in 2003: volumes rose 15% because of a surge in oil sands production and prices were 9% higher.

In 2003, the following commodities registered the largest export gains:

- Ethylene copolymers soared by $268 million to $720 million in 2003 (higher prices and higher volumes).
- After falling by more than half in 2002, exports of polyethylene rebounded strongly to $592 million from $343 million in 2002 (sharp rise in volumes).
- Shipments of OSB jumped to $563 million from $376 million in the previous year because of record price levels in 2003.
- Saturated acyclic hydrocarbons increased from only $33 million in 2002 to $183 million in 2003.
- Exports of refined light oils nearly doubled to $181 million.

For the third consecutive year, Alberta telecom equipment manufacturers were impacted by the global slowdown in the technology sector, with exports of electronic equipment (mostly telecom) falling 36% to $1.0 billion. The largest component, radio-telephone transmission equipment, slipped 61% to $255 million, while telephone switching equipment sank 48% to $120 million.

BSE caused live cattle exports to the U.S. to fall by 69%, from $635 million in 2002 to $196 million in 2003, and beef exports to tumble 30% to $910 million.

Top U.S. States

In this section, Alberta exports to major states in the U.S. are discussed. Because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination, they are not included in the state export totals shown on the next page. The U.S. Midwest region and California are the major markets for Alberta oil and gas. For a breakdown of exports by state including energy commodities refer to Appendix D.

California and Texas account for 30% of Alberta's non-energy exports to the U.S.

Even when excluding energy exports, Alberta's two top U.S. markets, California and Texas, rank ahead of Japan (Alberta's number two international market behind the U.S.). The top five U.S. markets in 2003 were:

- **California** maintained its position as Alberta's top U.S. market with exports valued at $1.3 billion in 2003, down 10% from the previous year. OSB became Alberta's largest non-energy export to California in 2003, up 49% to $199 million. The province's largest export to the state in 2002 was the gasoline additive MTBE, valued at $311 million that year. Because of a recent ban on the use of this additive in California, exports dropped to $0 in 2003. Exports of acyclic hydrocarbons increased sharply from $1 million in 2002 to $105 million in 2003. Strong growth was also recorded for refined light oils, styrene, canola oil-cake and meal, ethylene copolymers and polyethylene.

- **Texas** imported $1.2 billion worth of Alberta goods in 2003, down 11% from 2002. For the fourth straight year, styrene was the largest export to Texas at $142 million, down 61% from 2002. Close to $200 million of oil and gas field equipment, a wide variety of products ranging from pumps to boring machinery to oil field trucks, was shipped from Alberta to Texas in 2003. Other major exports to the state include liquefied butadiene and propylene, beef, ethylene copolymers, telecom equipment, polyethylene and beef.

- Exports to **Pennsylvania** increased 22% to $662 million in 2003. The largest commodities exported were polyethylene, which climbed to $211 million, and ethylene copolymers at $206 million. Beef, styrene and wood pulp make up the other major Alberta exports to Pennsylvania.
- **Illinois** reduced its Alberta imports by 8% to $595 million in 2003, mainly as a result of much lower shipments of furniture. Ethylene copolymers and polyethylene make up the largest export to the region at $121 million, followed by organic chemicals, furniture, and boneless beef.
- **Washington** dropped two notches to become Alberta's fifth largest U.S. market after experiencing a 21% decline in Alberta imports in 2003. This decline was largely the result of cattle imports dropping by one half (because of BSE). After live cattle, the next largest imports are OSB, refined light oils and diesel fuel.

Alberta Exports to the U.S. by State, Excluding Oil and Gas

State *	2002 ($ '000)	2003 ($ '000)	% Change
California	1,491,765	1,336,498	-10.4%
Texas	1,322,019	1,173,081	-11.3%

All other U.S. States	2,552,028	2,362,146	-7.4%
Total Exports to the U.S. (excl. Oil & Gas)	**12,526,416**	**10,825,631**	**-13.6%**

* Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids

Asia

Sharp declines in exports of coal and beef cause Asian imports from Alberta to fall in 2003

Asia saw robust economic growth of about 4% in 2003, roughly double the previous year's growth rate. Japan emerged out of its recession and recorded surprisingly strong growth, while China and India continued to expand at a rapid pace of more than 8% in 2003.

However, this strong growth did not translate into an increase in Alberta exports to the region. Asia imported $3.1 billion worth of Alberta goods in 2003, down 5.3% from 2002. Sharp declines in coal and beef were largely responsible for the decline. Other major exports, such as canola, pork, nickel, cobalt and lumber, climbed during the year. For the third straight year exports to Japan were down (-6.1% to $1.2 billion), while shipments to China fell for a second consecutive year by 0.9% to $740 million. Exports to South Korea were 29% lower than in 2002.

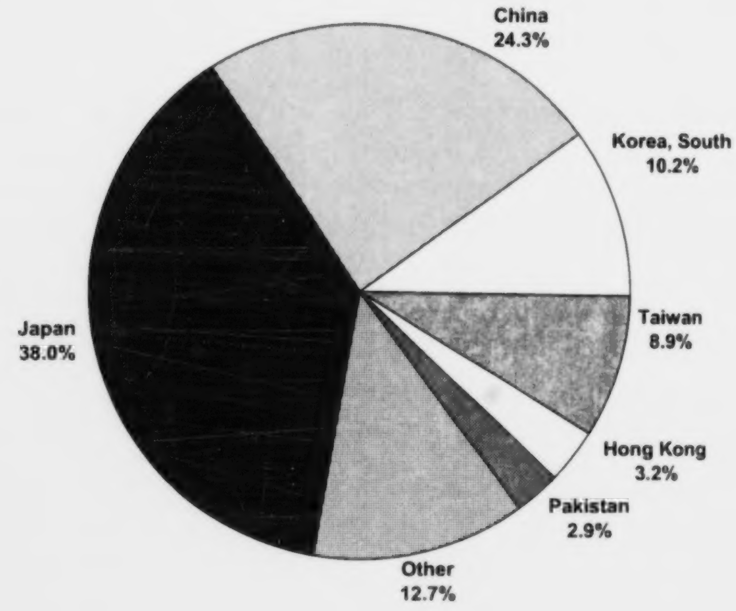
Alberta has seen its exports to Japan fall gradually, partly because of the continued weakness of the Japanese economy. However, the largest factor behind this decline has been the gradual loss of the Japanese coal market: coal exports tumbled from $309 million in 1998 to $13 million in 2003. A similar story has unfolded in South Korea, where coal imports from Alberta dropped from $131 million in 1999 to less than $2 million in 2003.

Alberta Exports to Asia in 2003



Total Exports: $3.1 Billion

Japan

> "All indicators for the Japanese economy are positive except government spending, meaning the stimulus is now coming from the private sector."
>
> **Wes Sawatzky, Alberta Japan Office**

Although the Japanese economy finally emerged from its prolonged economic slump, it further reduced its imports of Alberta products by 6.1% to $1.2 billion in 2003. Faced with very weak Japanese demand for international goods, Alberta exporters have seen the value of their shipments to the country decrease by 14% since 2000. Japan's share of Alberta exports to Asia has fallen gradually from 44% in 1998 to 38%. In 2003, Alberta accounted for 14.6% of Canada's exports to Japan.

Canola continues to be Alberta's largest shipment to Japan. Valued at $312 million in 2003, exports of the commodity were up 16% from 2002. Pork exports rose sharply by 38% to $171 million. Wood pulp was the third largest export commodity to Japan, declining by 14% to $166 million.

The next largest exports to Japan in 2003 all declined: forage products, such as hay and alfalfa, fell by 20% to $75 million, wheat by 31% to $63 million and malt by 20% to $53 million. Coal continued to put downward pressure on Alberta shipments to Japan, falling from $96 million in 2002 to $13 million in 2003. Because of BSE, beef exports fell by one half to $34 million.

China

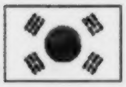
China reduced its Alberta imports by 0.9% in 2003, making large reductions in ethylene glycol and artificial filament tow (for cigarette filters) shipments. However, with shipments valued at $740 million, the country remained Alberta's second largest market in the region and third largest overall. The country is still one of Alberta's fastest growing markets as exports in 2003 were 54% higher than in 1998 – a growth rate only exceeded by the U.S. and Belgium when comparing the province's ten largest markets. Over the last ten years, exports to China have escalated by more than 150%. Driving much of this growth over both periods have been large increases in ethylene glycol, sulphur, ethylene copolymer and wood pulp exports.

Making up about one-quarter of exports, ethylene glycol was Alberta's largest shipment to China in 2003. Exports of the commodity were down 19% from 2002 to $185 million on lower volumes. The next largest export was wood pulp, which jumped 47% in value to $147 million, followed by artificial filament tow at $70 million, ethylene copolymers at $55 million and sulphur at $51 million.

China's share of Alberta exports to Asia was 24.3% in 2003. Alberta accounted for 19.2% of Canada's exports to China.

> "China's rapidly growing middle class presents an opportunity for Alberta exporters. The middle class accounts for almost one-half of the urban population and is expected to double in size by 2020."
>
> **David Wong, Alberta China Office**

South Korea



Exports to South Korea, Alberta's fourth largest market, declined for a third consecutive year, by 29% to $310 million, mainly as a result of lower coal and beef shipments. South Korea's share of Alberta exports to Asia was 10.2% in 2003, and Alberta accounted for 16.6% of Canadian exports to Korea.

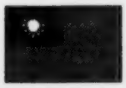
Coal exports tumbled by 97% in 2003 to $1.6 million, down from $46 million in 2002. This commodity was also largely responsible for the 30% decline in total exports to the country since 1998.

Lower volumes led to an 11% drop in wood pulp shipments to $180 million in 2003. Beef exports fell by nearly one-half to about $22 million, while ethylene glycol by one-quarter to $27 million.

The only other commodity with export values of more than $10 million was nickel, which was valued at $26 million in 2003, more than double 2002's value of $12 million.

> "Although domestic demand remains weak because of a consumer credit crunch and low business confidence, South Korea's economy is expanding strongly as a result of extremely high export growth."
>
> **Cliff Wulff,**
> **Alberta South Korea Office**

Taiwan



Taiwan's imports from Alberta in 2003 were virtually unchanged at $271 million. For a sixth consecutive year, Taiwan maintained its position as Alberta's sixth largest overall market. Taiwan's share of Alberta exports to Asia in 2003 was 8.9%, and Alberta accounted for 23.2% of Canadian exports to this country.

Taiwan, a major telecom producer, is also a large importer of electronics from Alberta. Although Alberta's global telecom exports have suffered steep declines since 2000, Taiwan's imports of Alberta telecom equipment have remained strong. Imports of computer and electronic products, most of which is telecom equipment, fell slightly to $98 million in 2003. However, these imports were nearly three times 2000's value, and accounted for more than one-third of Taiwan's overall imports from Alberta.

Other major exports to the country include hides and skins, up 56% to $69 million in 2003, wood pulp ($30 million), ethylene glycol ($15 million) and nickel ($14 million).

> "Taiwan's economy is expected to see strong growth this year, because of its sizeable ICT sector. ICT's recovery will cause export volumes to rise by more than seven per cent and private investment by more than nine per cent."
>
> **Li-an Chen,**
> **Alberta Taiwan Office**

Hong Kong

As Alberta's fifth largest market in Asia, Hong Kong imported $97 million worth of Alberta goods in 2003, 13% less than in the previous year. Hong Kong accounted for 3.2% of Alberta's exports to Asia, and Alberta's share of Canadian exports was 9.7%.

Like Taiwan, Hong Kong remains a major importer of computer and electronic products from Alberta. Although imports of these products (mainly telecom equipment) fell 9% to $44 million in 2003, they were still triple the 2000 value of these products.

The only other commodity to exceed $10 million in exports was hides and skins, which increased by 18% to $14 million.

> "The Closer Economic Partnership Arrangements (CEPA) between Hong Kong and mainland China are providing impetus for growth among Hong Kong's service sectors. CEPA allows easier access for Hong Kong goods and services entering into the mainland market. Alberta companies are recommended to capitalize on this opportunity and team up with Hong Kong companies in tackling the China market."
>
> **Christopher Liu,**
> **Alberta Hong Kong Office**

Western Europe

Alberta exports to Western Europe increased despite economic slowdown in the region

Western Europe experienced another slowdown in economic activity in 2003, with many countries, such as Germany, France and the Netherlands, in a short-lived recession. The Euro region suffered from weak domestic demand and declining investment and export volumes. As a result, the region recorded GDP growth of only 0.4% last year. The German economy contracted marginally by 0.1% and the Netherlands by 0.8%, while Italy and France had minimal growth of 0.3% and 0.2%, respectively. The United Kingdom (not a member of the Euro zone) expanded by a more respectable rate of 2.3%.

Even though the Western European economy remained weak last year, Alberta exports to the region increased by 5.6% to $980 million, largely because of higher volumes of nickel and wheat (especially durum wheat). The United Kingdom remained Alberta's top market in Western Europe, with exports rising 1.4% to $184 million. Exports to Belgium jumped 39% to also reach $184 million, while Italy and the Netherlands increased their Alberta imports by 13% and 10%, respectively.

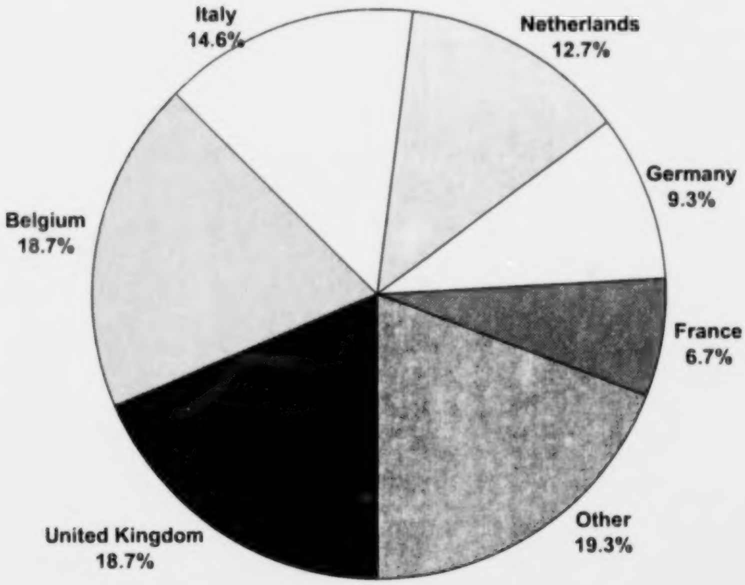
Since 1998, Alberta exports to Western Europe have fallen by 9.1%, with large declines in Germany, the Netherlands, Italy and the United Kingdom. Reversing this trend are other major importers such as Spain and Belgium with sizeable increases of 67% and 64%, respectively.

Alberta Exports to Western Europe in 2003



Total Exports: $980.0 Million

Alberta exports to Western Europe are fairly evenly distributed among the major markets. The United Kingdom and Belgium, Alberta's largest markets in the region, each accounted for 19% of the province's exports in 2003, followed by Italy at 15% and the Netherlands at 13%. From 1998 to 2002, Belgium has seen its share of Alberta exports to the region grow from 10.4% to 18.7%.

European Union

On May 1, 2004, the European Union's (EU) 15 member states[1] were joined by ten new members[2]. The Western European EU members account for nearly all (93%) of Alberta's export to Western Europe, while the new members account for 11% of Alberta's exports to Eastern Europe (eight of the ten accession members are located in Eastern Europe).

The expanded EU's imports from Alberta totaled $954 million in 2003, up 4.4% from 2002. Exports to the original 15 members were $915 million, and to the accession states $39 million.

The European Union takes in ten new member states

United Kingdom

The United Kingdom's economy fared much better in 2003 than that of most other EU members. GDP increased by a respectable 2.3%, the result of fairly strong growth in consumer and investment spending.

Alberta exports to the United Kingdom (U.K.) increased marginally by 1% to $184 million, as higher nickel shipments more than offset large declines for coal and surveying instruments. However, these exports fell by 20% between 1998 and 2003 as a result of large declines for used airplanes and coal. The U.K. accounted for 19.2% of Alberta's exports to Western Europe in 2003, and Alberta's share of Canadian exports was 3.4%.

Nickel exports rose 78% to reach $70 million in 2003, accounting for 38% of Alberta's total exports to the U.K. Wheat was the second largest export commodity at $22 million, followed by oil and gas field equipment, telecom equipment, instruments for physical and chemical analysis and medical appliances.

"The OECD predicts economic growth of 3.1% in 2004. Private consumption is likely to expand vigorously, and will be in part responsible for powering Britain's economy to such a robust recovery."

Chris Heseltine,
Alberta United
Kingdom Office

Germany

Impacted by a recession and flat domestic demand, Germany reduced its imports from Alberta for the third year in a row in 2003. Alberta exported $91 million worth of goods to Germany in 2003, down 6.5% from the year before and 45% from 1998 levels. Lower wood pulp exports caused most of these declines. Germany accounted for 9.5% of Alberta's exports to Western Europe, and Alberta's share of Canadian exports was 3.4%.

Totaling $44 million and accounting for just under one-half of total shipments, wood pulp continues to dominate Alberta exports to Germany. These exports dropped by 15% between 2002 and 2003.

A combination of chemicals (especially carbon), machinery and transportation equipment make up most of the remaining exports to Germany. Like most other coal markets, Germany drastically reduced its imports of Alberta coal: from $11 million in 2002 to $2 million in 2003.

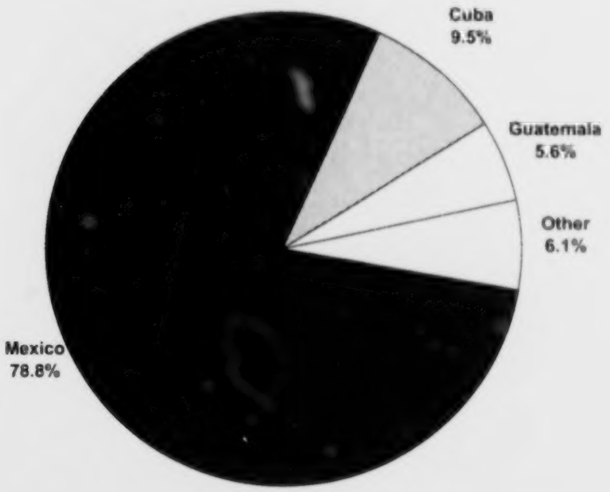
> "EU enlargement has evoked fears that German enterprises will relocate production facilities to new EU members where labor cost is considerably lower."
>
> **Reg Kontz, Alberta Germany Office**

Central America, Mexico and the Caribbean

The Central American region, which includes the Caribbean and Mexico, continues to be plagued by high debt burdens, banking problems and large fiscal deficits. GDP grew modestly by about 1.5% in 2003, partly because the region's largest economy, Mexico, grew a mere 1.3%.

BSE caused Alberta beef exports to Mexico to fall by nearly one-half. This in turn translated into a 9.2% drop in provincial exports to the Central American region. However, with exports worth $515 million in 2003, the region continued to be the province's fourth largest regional market.

Alberta Exports to Central America in 2003



Total Exports: $515.5 Million

Even with the sharp decline in beef imports, which caused exports to fall by 9.2% to $406 million, Mexico remained Alberta's top market in the region. Mexico accounted for 79% of Central America's Alberta imports. Imports into Cuba rose 11% to reach $49 million, but Guatemala reduced its Alberta imports by 27% to $29 million.

Although Alberta shipments to the region have fallen for two consecutive years, they were 24% higher in 2003 than in 1998, mostly because of increases in beef imports by Mexico.

Mexico

Mexico's economy expanded by a weak 1.3% in 2003, the third consecutive year of little or no economic growth. Although consumer spending remained strong, capital investment declined for the third year in a row, while export growth remained weak.

Alberta's exports to Mexico fell by 9.1% to $406 million. This decline resulted from a sharp decrease in beef shipments due to the detection of BSE in Alberta. Valued at $89 million in 2003, fresh boneless beef exports to Mexico dropped 44%, while other lower volume beef products had even sharper declines.

Because of the large decline for boneless beef, canola, Mexico's largest import from Alberta in the nineties, became the top import in 2003. Canola imports totaled $110 million, an increase of 35% from 2002. Wheat shipments fell 7% to $50 million in 2003. Other major imports include oil and gas field equipment (such as boring and sinking machinery), wood pulp, malt and polyethylene.

> "As Alberta's second largest market for beef exports, Mexico continues to be of strategic importance for Alberta producers."
>
> **Lorena Patterson, Alberta Mexico Office**

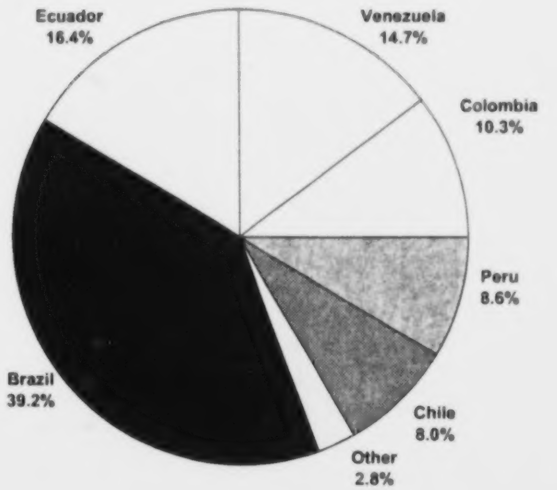
South America

South American imports of wheat and coal near record lows

The South American region started to emerge from a two-year recession in 2003. Although Venezuela's economy declined sharply for the second year in a row and Brazil entered a short-lived recession, Argentina emerged strongly from its four-year setback, while Chile continued to show strong growth. As a result, overall growth for the region came in at about 1.5%, an improvement over the contraction of roughly 1% in 2002.

South America imported 8.6% less from Alberta in 2003 than in 2002, as imports of wheat, durum wheat, oil and gas field equipment and especially coal declined. Even though imports by Brazil and Ecuador rose strongly, shipments to Venezuela, Colombia, Peru and Chile fell. $288 million was imported by South America in 2003, the lowest value in nine years, mainly because wheat and coal imports were at their lowest levels since at least 1991.

Alberta Exports to South America in 2003



Total Exports: $287.7 million

Between 1998 and 2003 imports into South America fell 20%. 1998's top three markets, Brazil, Venezuela and Colombia, all had lower imports from Alberta in 2003 compared with 1998. In fact, imports by four of the region's largest markets, Venezuela, Colombia, Peru and Chile reached their lowest levels since at least 1995. The only country to register import growth over this five-year period was Ecuador with a gain of 27%.

Middle East

Alberta exports of oil and gas field equipment to the Middle East drop

The Middle Eastern economy, including North Africa, expanded at a strong rate of 5.1% in 2003, the highest growth since 1991. The economies of oil exporting nations, such as Iran, the United Arab Emirates (UAE) and Saudi Arabia grew by about 6% because of high oil prices and increased production. This in turn led to increased public spending and capital investment.

However, the improved fortunes for the region did not translate into higher Alberta exports. Alberta exports to the Middle East fell 4.9% to a four-year low of $288 million. Shipments of oil and gas field equipment and machinery tumbled: boring or sinking machinery declined from $17 million in 2002 to $7 million in 2003; parts of boring or sinking machinery declined from $67 million to $37 million; rectifying or distilling plant from $20 million to $109,000; and filtering or purifying equipment for liquids from $14 million to $59,000. These declines were offset somewhat by higher shipments of wheat, barley and lifting and handling equipment (also for the oil and gas industry).

The UAE became Alberta's largest regional market in 2003, with exports rising 14% to $61 million because of increased sales of wheat and surveying instruments. Exports to Iran fell 19% to $53 million with large declines for rectifying or distilling plant, concrete mixers and trailers. Saudi Arabia nearly doubled its Alberta imports to $36 million, as barley shipments totaled $17 million compared to no such shipments in 2002.

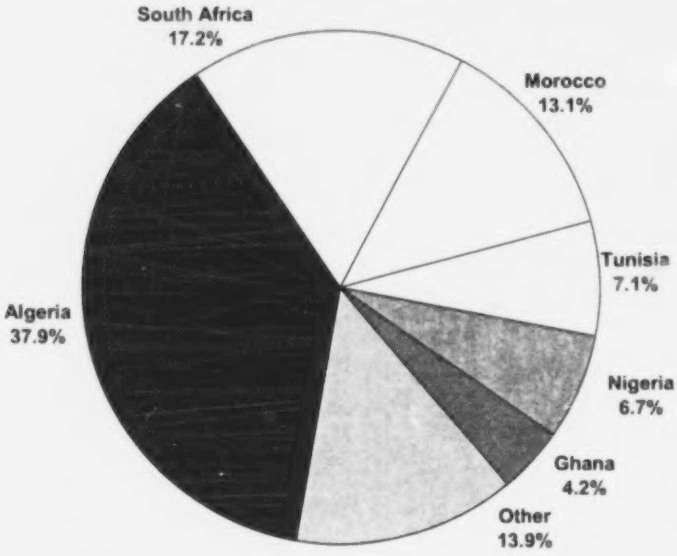
Africa

Sharp decline in grain shipments causes exports to Africa to fall

Economic growth in Africa[1] was weak in 2003, at about 2.5%. West Africa's oil exporters performed strongly, as the region continues to increase its share of global oil production. Other African economies continued to under perform due to several factors, including poor weather conditions and weak European demand. On a per capita basis, Africa's economic growth was less than 0.5% in 2003.

Africa's economic slowdown may have contributed to the 6.7% decline in Alberta's exports to the region. Exports fell to $200 million, the lowest value since 1994. Accounting for 45% of Alberta's exports to Africa, wheat shipments (including durum wheat) fell by one-third, while barley dropped by one-half. However, sulphur and oil and gas field equipment exports shared strong growth.

Alberta Exports to Africa in 2003



Total Exports: $200.0 million

Algeria maintained its position as Alberta's largest market in the region in 2003, importing more than twice as much as South Africa – the second largest market. Shipments to Algeria grew by 2.6% to $76 million, as a large decline in durum wheat exports was more than offset by strong growth in oil and gas field machinery.

South Africa's imports grew by 0.5% to $34 million: sulphur shipments were up and barley shipments down. Morocco's imports decreased 8.6% to $26 million, also because of declining durum wheat sales.

Since 1998, exports to the region have fallen by one-third, mainly because of sharp drops in wheat, durum wheat and sulphur shipments.

---

[1] Excludes some North African countries, which for this report are classified as Middle Eastern.

Eastern Europe

Strong CIS oil industry and wheat sales to Romania cause large rise in Alberta exports to Eastern Europe

Strong oil revenues provided a boost to consumer demand and investment in the CIS (former Soviet Union) states. The new eastern members of the EU also had strong growth, as exports to the original group of EU members were booming. As a result, the economic growth rate for the entire Eastern European region increased to 5.5%.

Eastern Europe, one of Alberta's fastest growing regional markets, imported 38% more from Alberta in 2003 than in 2002. The region imported $160 million worth of Alberta goods, up from $116 million in 2002 because of higher industrial equipment sales, most of it used by the oil and gas industry, and a surge in wheat imports.

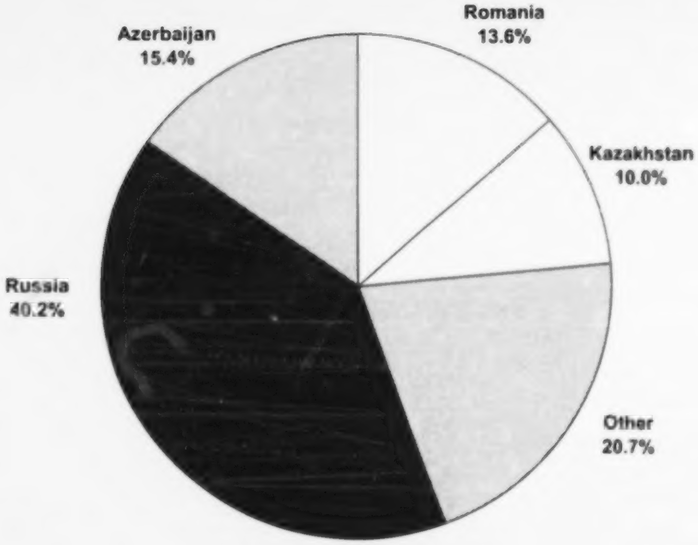
Exports to the region are up 78% since 1998 – the second highest growth after the U.S. While several commodities contributed to this increase, most of the growth came from exports of oil and gas field machinery, industrial equipment and wheat.

Russia, the largest economy and Alberta's main market in the region, captured 40% of the province's exports to Eastern Europe. Russian imports rose 16% from 2002 to 2003, again as a result of strong growth in oil and gas field equipment. Growth in that sector has also been the cause of higher imports by Azerbaijan - imports increased from $2 million in 2002 to almost $25 million in 2003 (large rise in oil and gas related industrial equipment).

Alberta Exports to Eastern Europe, 2003



Total Exports: $159.9 million

Higher wheat sales caused Romania's imports to rise from $791,000 in 2002 to nearly $22 million in 2003.

Oceania

Oceania records largest increase in Alberta imports for second consecutive year

Oceania consists of Australia, New Zealand and other South Pacific countries. In 2003, the region registered economic growth of close to 3%, as a result of strong growth in investment and in consumer spending. With imports valued at $139 million, Oceania remains Alberta's smallest regional market.

Australia and New Zealand dominate this region, capturing 96% of Oceania's imports from Alberta. Because of a 53% increase in shipments to Australia, exports to Oceania rose 41% – the highest increase among all regions.

Australia accounted for 79% of Alberta's exports to Oceania in 2003. Large increases for gas compressors, ethylene copolymers and fabricated metals caused the large jump in exports to Australia. New Zealand imported about the same dollar value in 2003 as in 2002: a large decline in fertilizers was offset by an equally large rise in synthetic resins.

Even though sales to New Zealand have fallen in recent years, Alberta has seen its shipments to Oceania rise in value by 21% since 1998. The largest exports to the region in 2003 were oil and gas field equipment, synthetic resins and telecom equipment.

Alberta International Trade Review 2003

Country Profiles

Algeria

Capital:	Algiers
Official Language:	Arabic
Population (Jul '03 est.):	32,818,500
Currency:	Algerian Dinar (DZD)
DZD/US$:	79.68 (2002), 77.22 (2001)
GDP at PPP/Capita ('02 est.):	$ 5,400 (US)
Imports (2002):	$ 10.6 Billion (US)
Major Suppliers:	France, Italy, U.S., Germany, Spain

Exports from Alberta

HS Code	Commodity Description	Canada 2003 ($)	Alberta 2002 ($)	Alberta 2003 ($)
100110	Durum wheat	204,000,820	54,502,770	34,574,072
842890	Lifting, handling, loading or unloading machinery nes	17,869,679	0	17,869,679
843143	Parts of boring or sinking machinery, whether or not self-propelled	3,786,090	3,015,996	3,725,104

Idaho	210,691	225,433	193,613	-14.12%
Kansas	1,125,581	247,528	174,377	-29.55%
Louisiana	140,848	191,366	173,654	-9.26%
Kentucky	134,986	107,587	146,872	36.51%
Missouri	182,170	173,698	146,392	-15.72%
North Carolina	194,314	146,431	144,585	-1.26%
Indiana	188,136	103,720	143,945	38.78%
Oklahoma	94,932	114,047	115,032	0.86%
Alaska	103,727	125,307	101,923	-18.66%
Nebraska	118,296	116,719	100,097	-14.24%
Nevada	82,243	80,337	83,273	3.65%
South Carolina	98,507	94.785	75,228	-20.63%
Arkansas	47,619	36,507	72,450	98.46%
Maine	56,671	71,694	68,115	-4.99%
Alabama	76,917	77,029	65,535	-14.92%
Maryland	78,496	73,605	61,226	-16.82%
South Dakota	104,601	71,079	57,311	-19.37%
Mississippi	22,298	45,106	51,161	13.42%
Delaware	13,924	7,313	40,034	447.45%
Connecticut	418,980	60,225	35,875	-40.43%
New Hampshire	32,031	47,501	35,411	-25.45%
New Mexico	23,581	23,134	25,831	11.66%
West Virginia	46,457	47,311	23,934	-49.41%
Rhode Island	3,968	6,356	13,716	115.80%
Hawaii	7,831	17,302	7,989	-53.83%
Puerto Rico (U.S.)	17,357	16,762	4,554	-72.83%
District of Columbia	10,814	5,964	1,816	-69.54%
Virgin Islands (U.S.)	55	305	101	-66.83%
Unknown State	563,950	537,401	509,596	-5.17%
TOTALS	50,632,833	42,931,025	51,120,304	19.08%

** Exports to individual states can be seriously over or under-stated because energy exports, such as crude oil or natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated, while exports to California are understated.
